West Bengal – 700124 , India

EDUCATION

Brainware University

Bachelor of Technology – Computer Science and Engineering (AI&ML)

CGPA: 7.58 Out of 10

Barasat, West Bengal, India

2023 – 2026

Bishnupur Public Institute Of Engineering

Diploma (Polytechnic) – Computer Science and Engineering

SGPA: 8.9 Out of 10 , Percentage: 83.1

Bishnupur, West Bengal, India

2020 – 2023

INTERNSHIP

DataSpace Academy

CCNA & Python Programming

July' 2022

- Completed training in CCNA and Python Programming, gaining hands-on experience in network configuration, IP addressing, routing and switching fundamentals, network troubleshooting, and Python scripting for automation, problem-solving, and software development.

Euphoria GenX-Industrial Training 2025

April-July' 2025

- Completed an industrial training in MERN Stack Development, developing scalable full-stack web applications using MongoDB, Express.js, React.js, and Node.js while implementing RESTful APIs, authentication, CRUD operations, database integration, Git/GitHub version control, and industry-standard software development practices.

PROJECT

AI-Based Fraud Detection System

[\[REPO LINK\]](#)

[\[LIVE\]](#)

Jan'26 – Mar'26

- Developed an AI-powered fraud detection system using Machine Learning (XGBoost, Random Forest) and Deep Learning (LSTM Autoencoder) to identify fraudulent transactions and anomalous user behavior with high accuracy.
- Engineered a complete data preprocessing and feature engineering pipeline, including missing value handling, class imbalance (SMOTE), feature scaling, and model optimization to improve prediction performance.
- Built a real-time fraud monitoring dashboard with secure RESTful APIs, risk scoring, transaction analytics, and explainable AI insights for instant fraud detection and decision support.
- Tech Stack: Python, Scikit-learn, TensorFlow/Keras, XGBoost, Pandas, NumPy, Flask/FastAPI, React.js, MongoDB, REST APIs, JWT Authentication, Git

Healthcare In AI

[\[REPO LINK\]](#)

[\[LIVE\]](#)

Sept'25 – Dec'25

- Developed an AI-powered healthcare web application with multimodal AI chatbot (text, voice, image) for medicine information retrieval, symptom-based assistance, and online doctor appointment scheduling.
- Integrated Google Gemini API for natural language processing (NLP), context-aware responses, and AI-driven medical assistance.
- Designed a scalable full-stack architecture with secure RESTful APIs, role-based access, and optimized MongoDB queries for high performance.
- Tech Stack: React.js, JavaScript (ES6), MongoDB, Google Gemini API, RESTful APIs, JWT Authentication

Doctor Appointment Booking System

[\[REPO LINK\]](#)

[\[LIVE\]](#)

Apr'25 – July'25

- Developed a full-stack Doctor Appointment Booking System enabling patients to search doctors, schedule appointments, and access healthcare services across multiple locations in India through an intuitive and responsive web platform.
- Implemented secure online payment integration, appointment scheduling, booking confirmation, cancellation, and automated notification features to provide a seamless end-to-end patient experience.
- Designed role-based authentication for Patients, Doctors, and Administrators with secure profile management, appointment tracking, doctor availability management, and centralized healthcare data management.
- Tech Stack: React.js, Node.js, Express.js, MongoDB, REST APIs, Razorpay, JWT Authentication, Cloudinary, HTML, CSS, JavaScript, Git, GitHub

Jarvis – Voice Controlled Assistant

[\[REPO LINK\]](#)

Jun'24 – Sept'24

- Built an AI-powered voice-controlled virtual assistant to automate system operations and web applications using speech recognition and command parsing.
- Automated social media and messaging workflows (WhatsApp, Instagram, Facebook) 90% accurate.
- Enabled real-time voice command processing using speech-to-text APIs, Python automation scripts, and third-party API integrations.
- Tech Stack: Python, JavaScript, Firebase, Speech Recognition APIs, Google Gemini API, REST APIs, React.js, CSS

eBook Commerce Platform

[\[REPO LINK\]](#)

[\[LIVE\]](#)

Nov'24–Dec'24

- Developed a full-stack eCommerce platform enabling users to buy, sell, and read digital books, with secure payment-ready architecture.
- Implemented secure user authentication, authorization workflows, and dynamic content rendering .
- Optimized database queries and frontend performance to ensure scalability, responsiveness, and fast load times.
- Tech Stack: React.js, JavaScript, MongoDB

SKILLS

- Programming Languages: Python, JavaScript
- AI & ML: Machine Learning, Deep Learning, TensorFlow, Scikit-learn, XGBoost, LSTM, OpenCV, Feature Engineering, Data Preprocessing, Model Evaluation
- Frontend & Backend: HTML, CSS, React.js, Flutter, Angular, TypeScript, Node.js, Express.js, Flask, FastAPI
- Database: MongoDB, Firebase, MySQL, PostgreSQL
- Cloud & Tools: AWS, Git, GitHub, Docker, Virtual Machines
- APIs & Others: REST APIs, API Integration, JWT Authentication, AI, Data Visualization, Pandas, NumPy
- Soft Skills: Problem Solving, Research & Analysis, Team Leadership & Management, Effective Communication

CERTIFICATIONS

- Euphoria GenX-Industrial Training 2025
- Python 3.4.3 , C , CPP Training – Spoken Tutorial Project, IIT Bombay, 2025
